

VELOCITY

It ships every month. You sell a moving product.

v0.4 — AI that ACTS: books campus visits, sends brochures, prescribes the next best action per lead

v0.5 — Premium: Lead-360° CRM drawer, ₹ cost-per-joined analytics, Telugu voice input, ratings, principal's Monday digest, PWA install, backup, rate-limiting

v0.6 — Staff & Roles: 8 role types, per-person screen allocation by the Owner, WhatsApp credentials, per-role Help in Telugu

Moat: every release deepens switching costs — data, staff logins and daily habits all live inside SeatSetu

UNIT ECONOMICS

8 logins per college. Embedded by design.

8+ users

per campus from day one — not one login, a department

Higher price headroom

premium console + staff system justify the bundle,
not discount it

Churn shield

role habits + owned data + Monday digest =
renewal by default

Penetration: counselor uses it daily, director reads it weekly, principal gets its digest — three hooks per campus

Referral engine: principals talk to principals; "one login per person" is the demo that spreads

A PRODUCT BY POOJA SOFT SOLUTIONS · ONGOLE, ANDHRA PRADESH

Own the AI back office of **1,500 colleges.**

SeatSetu — admissions, accreditation and placement training for India's tier-3 colleges.
A partnership briefing for the team that will sell it.

✓ Built & QA-passed 65/65

₹0/month infrastructure

3 renewal hooks per college

THE OPPORTUNITY

A forced-buy market. Every college, every year.

Seat vacancies are existential for tier-3 colleges: capped fees, stuck reimbursements, and AICTE closing down colleges that can't fill seats. NAAC paperwork and placement proof decide survival. Nobody has sold them a professional back office — until now.

64%

of MTech seats vacant nationally
(AICTE 2025-26)

~47%

AP private-college seats vacant at
season end

+58%

vacancy jump in one year
(Karnataka '26)

5,875

engineering institutions fighting for
the same students

Dec 31

AQAR deadline — recurring, non-
negotiable

THE PRODUCT — SHIPPED, NOT PROMISED

One login. Three revenue problems **solved.**

Admissions

- Telugu + English AI counselor, 24×7
- 60-second lead response
- Follow-up engine + attribution

Accred

- CO-PO attainment from existing Excel
- AQAR vault, gap analysis
- Bloom-mapped question papers

Careers

- AI mock interviews with STAR scoring
- NAAC 5.1.2 evidence export
- Placement proof feeds admissions

65/65

automated QA checks passing
today

₹0/mo

infrastructure — free tiers, Vercel-
deployed

3 hooks

per college: season + AQAR +
placement year

Guardrailed

no invented fees/jobs/promises —
legally safe

UNIT ECONOMICS

~92% gross margin.
Break-even at ~10 colleges.

₹49k

Admissions season license

₹39k

Accred / year

₹39k

Careers / year

₹99k

Full bundle (intro price)

The cost side

- COGS ₹4–8k per college per year (infra + WhatsApp msgs)
- No licenses, no servers, no per-seat SaaS fees
- Delivery cost = one CKP sit-down per college

The revenue side

- Every college renews 3 ways: season, AQAR, placements
- Ads-management retainers ₹15–30k/mo on top
- CAC payback: under one season (field + consultants)

THREE-YEAR PLAN

District by district → state by state.

YEAR 1 — Kadapa + Rayalaseema: 15–25 colleges · ₹12–20L · 2–3 free design partners become case studies · consultant channel signed

YEAR 2 — Andhra Pradesh: 60–100 colleges · ₹40–75L · ads retainers attach on 30% of accounts · first degree-college Module B deals

YEAR 3 — AP + Telangana + Karnataka: 300 colleges · ₹1.8–2.5Cr ARR · white-label for consultants · seed raise for 4-state scale

Serviceable base in the first 3 states alone: 1,200–1,500 engineering colleges — before touching 50,000+ degree colleges with the Accredited wedge.

WHY POOJA SOFT SOLUTIONS WINS

The quadrant **nobody** serves.

vs Admissions CRMs

- Meritto / ExtraaEdge / LeadSquared: ₹2–10L+/yr
- Enterprise sales teams, English-first, metro focus
- SeatSetu undercuts 4–8× and speaks Telugu

vs NAAC consultants

- ₹1–10L per cycle, city-by-city, manual
- SeatSetu Accred: ₹39k/yr, deterministic math, always on

vs "just use ChatGPT"

- No credentials, no consent ledger, no audit trail
- SeatSetu: approved-facts guardrails + DPDP + kill switch

Local

Ongole-based team principals actually meet

Cross-sell

GrowKitt client base = warm intros

Moat

vernacular AI + college data lock-in (CKP)

Price

incumbents can't cut 80% without dying

GO-TO-MARKET ENGINE

How the first 25 colleges actually get signed.

- ✓ **Design partners (free, first 3):** Kadapa colleges — case studies + referrals in exchange for feedback
- ✓ **Consultant channel:** NAAC/admission consultants white-label SeatSetu for their client base
- ✓ **Campus workshops:** free "AQAR by Dec 31" sessions → module B leads → bundle upsell
- ✓ **Field assets:** QR on hoardings/banner ads → opens the AI counselor → demo sells itself
- ✓ **Season clock:** EAMCET counseling Jan–Jun is the deadline that forces decisions

season to CAC payback
on every channel above

THE PARTNERSHIP MENU

Three ways in. Pick your lane.

A · Capital partner

- Funds 2 field sales + Meta ads + WhatsApp API deposits
- Est. ₹6–10L deployable over 12 months
- Revenue share / equity, milestone-gated

B · Distribution partner

- Bring the consultant/institution network
- PSS handles product, delivery, support
- 20–30% of every deal sourced

C · White-label channel

- Your brand on SeatSetu for your client colleges
- PSS runs everything under NDA
- Fixed per-college wholesale price

Common to all: the tech risk is already retired — partner money buys speed, not survival.

RISKS, HONESTLY

What could slow us — and the **answers.**

Long college sales cycles → free design partners + seasonal deadline (EAMCET Jan–Jun) force urgency; consultants bring warm accounts

NAAC timing risk → AQAR hits every accredited college on Dec 31, every year — a recurring clock, not a one-off

LLM / AI reliability → approved-facts-only RAG, guardrails + kill switch, graceful human escalation; wrong answers are blocked, not apologized for

Incumbent response → they can't cut ₹10L products to ₹49k; local vernacular delivery is their structural blind spot

Churn → 3 renewal hooks + College Knowledge Pack data the college owns inside SeatSetu — switching costs grow every term

NEXT STEP

One district. Ninety days. Then the numbers talk.
