

SALES & DELIVERY PLAYBOOK · POOJA SOFT SOLUTIONS

College Onboarding Kit

Everything to take a college from first meeting to live in 7 days — what to ask, what to collect, where to paste the code.

1 • The 90-minute sit-down (your CKP session)

Who to call into the room: Principal (decision maker) · Administrative Officer (fees/intake truth) · Placement Officer (placement data) · IQAC coordinator (if Module B is in scope) · office clerk with the current prospectus/fee file.

- 1 0–10 min — **Demo first.** Open `/widget/1` on your laptop/phone. Let the principal type a question in Telugu. Then have them try the "100% guarantee" trap. This sells the meeting — do it before any paperwork.
- 2 10–45 min — **Build the College Knowledge Pack live.** You type into the dashboard (Section 2 worksheet below); they correct you. Say: *"I'll do the typing sir, you just correct me."*
- 3 45–60 min — **Approve the tone.** Show 5 sample answers (fees, hostel, bus, placements, guarantee-refusal). Principal initials the approval line (Section 4).
- 4 60–75 min — **Integration.** Get their webmaster on phone/WhatsApp; paste the one-line embed (Section 5). Test it live on their site.
- 5 75–90 min — **Follow-up machine.** Connect their Meta lead form if any, set WhatsApp follow-up consent wording, agree the go-live date.

2 · Information worksheet (fill during the meeting)

College profile

Field	Ask exactly this	Write here
Full name + short name	"Name as it appears on the gate board?"	_____
City / district / EAPCET code	"What code do parents quote?"	_____
About (3 lines) + location landmark	"How do you introduce the college?"	_____
Admission process steps	"Walk me through what a parent does after enquiring."	_____

Courses & fees (the heart of the CKP — get the government order/prospectus)

Course	Code	Intake	Convener ₹/yr	Management ₹/yr	Note (NRI/spot etc.)
CSE					
ECE					
EEE					
Mech / Civil					
MBA / MCA / MTech					
Diploma (if any)					

Few-seats-left urgency lines

Token/registration amount

Hostel fee + meals

Bus routes + fee

Scholarship help (jvd/reimbursement status — facts only)

Placements (Module C fuel — last 3 years)

Year	Eligible	Placed	%	Highest ₹/LPA	Top recruiters
2025-26					
2024-25					

Forbidden-claims list (read back to the principal — this protects THEM)

Mark ∞ what the AI must never say: ☐ "100% placement guarantee" ☐ any invented fee ☐ job-in-company promises ☐ invented scholarships ☐ salary promises beyond letters. The AI refuses these and books a visit instead — agreed in writing.

3 • Files to collect from the college (checklist)

☐ Latest prospectus / fee structure
GO — the AI quotes exact fees from this

☐ Course approval / EAPCET code proof

☐ Placement letters or circulars (top 10 recruiters)

☐ College logo (PNG/SVG) + 5 campus photos

☐ Hostel & transport fee circular

☐ Previous AQAR copy + NAAC certificate (if Module B)

☐ Semester marks sheets (CSV/Excel — Module B template provided)

☐ Admission enquiry form fields (to match lead capture)

☐ Meta lead-form access (if they run ads) — add you as advertiser

☐ Signed approval page (Section 4)

4 • Approval & sign-off

We, the undersigned, approve the fees/placement figures entered in the College Knowledge Pack and confirm the AI must answer only from this approved data, refusing guarantee-type claims.

Principal: _____

Pooja Soft Solutions: _____

Date: _____

Date: _____

5 • Website integration menu (even if they already have a website)

The one-liner (preferred — works with any site: custom PHP, Laravel, WordPress, Joomla, Wix):

```
<script src="https://YOUR-SEATSETU-HOST/embed.js" data-college="1"></script>
```

Paste once before `</body>` in the site template → a branded  bubble appears on every page. Their webmaster needs 5 minutes. No redesign, no migration, nothing else changes on their site.

Option	When to use	How
A • embed.js bubble ★	They have any working site	One line before <code></body></code> ; bubble opens the AI chat in a panel
B • Direct link + WhatsApp	No website access (slow webmaster)	Link <code>/widget/1</code> from their "Admissions" button; pin WhatsApp <code>wa.me/91...</code> with the AI replying
C • iframe page	They want it inside a page	New page "Chat with us" containing the widget iframe
D • QR codes (offline)	Hoardings, banners, bus boards, notice boards	QR → <code>/widget/1</code> ; every scan is a tracked lead (source: qr)
E • Subdomain	Premium accounts	<code>admissions.college.ac.in</code> CNAME → SeatSetu landing (we help configure)

Worked example — pace.ac.in (PACE ITS, Valluru, Ongole)

Custom PHP/Laravel site with an Admissions page, IQAC page and T&P cell — all three modules map perfectly: **Module A** on the admissions page (embed.js + QR on their hoardings), **Module B** via their IQAC (AQAR vault), **Module C** via T&P (mock interviews + NAAC 5.1.2 evidence). Pitch angle: *"You are 20 minutes from our Ongole office — we'll sit with your AO and IQAC this week and you'll see it on your own website the same day."*

6 • Go-live checklist (day 4)

- ☐ CKP approved & test chat passes the "suspicious parent" trial (fees, hostel, guarantee-trap)
- ☐ embed.js live on their site + bubble tested on mobile
- ☐ QR printed on at least the main hoarding/banner
- ☐ Counselor's phone receives the first hand-off test (call routing confirmed)
- ☐ Kill switch location shown to the principal; admin password handed over personally

SeatSetu — Admissions • Accred • Careers
